Division No. 1 was instituted in this city Nov. 10, 1871 and had on its roll 65 members, the most prominent Irishmen of the city at that time. The first officers were Bernard Carroll, president; Patrick J. O'Connor, vice president; James B. Shannon, recording secretary; Jeremiah D. Diegers, Grandel D. Duggan, financial secretary; Patrick D Murphy, treasurer. The order immediately became very

popular and has continued as such for fifty years. It being a benevolent or-ganization it has been most willing in rendering aid to many of its members rendering and to many of its incliners who may require assistance. It has not confined its work simply to members but has been most liberal in contributions to all appeals comming from Ireland when conditions necessitated. The division has always been active in taking part in all appeals demonstrations held in the city as Conlan, a mission father, who told of a trip through Ireland in 1914, closing his talk with a fervent prayer and hope for order in other cities in the state. There is scarcely a division in the state as well known as the local division as many of the state and national officers have been members of the local division. The divi-sion has a membership of 110 and in the treasury there is a balance of \$3,250 of which \$2,000 is in Liberty and Victory The present officers of the di vision are Daniel J. Fagged Feelings Drag Spirits Down

Caused By Decayed Waste in Blood-Pepto-Mangan Needed.

When a man's feelings get into a crumbling condition and the fabric of his strength seems unstable, and he begins to look sullen and think dark, discouraged thoughts, it is usually caused by stale blood, clogged with waste which acts like a poison on the system.

In stale, weakened blood Gude's Pepto-Mangan starts a change. It feeds the blood with iron and other ingredients that make blood red and full of vigor. There is immediate evi-dence of the restorative powers of enriched blood. Perhaps it is more noticeable in the smack and flavor of food. After sleep there is a sort of triumphant feeling of refreshed vigor. Great is the delight of restored health, Physicians recommend and prescribe Gude's Pepto-Mangan. WOMAN'S PENSION BILL Members of the Fraternal Order of in Norwich and throughout the fate, the citizens of Norwich and the citizens of the state were urged to sup-port and introduce a woman's pension bill for the state, by Frank E. Hering, of South Bend, Ind., past worthy president of the Eagles and editor of the Eagles Magazine, at an open meeting ld under the auspices of the Norwich Aerie of Eagles at the Community house at 2.39 Sunday afternoon. The attend-ance while small, was very enthusiastic, and much impressed by Mr. Hering's

Mr. Hering started to talk on the old age pension but upon finding that Con-necticut was one of the seven states in the Union not having a woman's pen-sion law, devoted a large part of his speech to that subject. In the open-ing of his talk he asked what is the purployed. Then there ference soon regarding disarmament which means another great reduction in which means another great reduction in the denational expense if successful. The de-crease in armiment means the decrease in the possibility of war and this means less tax and money for the individual. In the past seven years the world has seen the greatest changes in its his-ery. But what has this to do with the Eagles? It is simply this; of the 500,000 members of the Fraternal Order of Eagles over 80 per cent of them are wage earners. What affects the wage earner affects the order of Eagles in conequence ,thus it stands that anything der of Eagles stands for service. Christ said, "He who shall be first must first learn to serve." Look into your lives and see if your greatest feelings of happi-ness have not come from acts of ser-vice. Happiness is a reflection; a mother is happy as her family is happy

A newly patented kind of food put up ready for the houseweek's instant use, is prepared by mixing fine chopped meat with milk and a lite flour. The paste this formed is filled into molds and ex-posed to heat whereby the contents undergo slight shrinkage and acquire a sort of "skin." The molded masses are thus easily dropped out to be thereupon put in-to cans, which are sterilized and scaled.
